LCD3 ALUMINUM BIFOLD

LCD3 ALUMINUM BIFOLD SYSTEM

Strikingly clean and narrow, our all aluminum bifold system features a 2 3/4" stile and rail profile allowing for more glass and light. Suitable for both residential and commercial projects, the LCD3 Aluminum Bifold System comes available in a clear or dark bronze anodized finish, and can also be custom color matched.

Systems to 10 feet tall are designed to have an uninterrupted sight line and overall widths can extend to 52 feet with 8 panels in each direction, a true large sliding door alternative that creates more space. Concealed locking shute-bolts provide an easy and secure hold on the door and is both stylish and functional.
